☺ About Me

Hi, I am Ruei-Yuan Liou from Taiwan. I like coding as well as learning new stuff. Moreover, I believe a good user interface design is the key element of a great product. In addition, I'm always curious about new things such as VR, Kotlin, and so on. I love to reading, playing video games, and doodling in my free time. Hope I have a chance to make a great product with talented teams.

Ruei-Yuan Liou
Android Developer
